

LED-ING EDGE

Solid-state technology is the light source of choice for these new decorative fixtures.

1

SIMPLE SCONCE

Made in California, the Tersus sconce casts a long-reaching light pattern on the wall and is available in numerous finishes and materials, making it a versatile choice for all kinds of compositions and applications. The Tersus faceplate can be ordered in solid wood, polymer, metal, or stone (marble) and is illuminated by a 13-watt, integrated LED in either 2700K or 3500K. It has a light output of 1,130 lumens in 90+ CRI.
