

Featuring 2,000 Decorative Lighting Suppliers Worldwide

## Ceiling ctd

### 1. Cocoon HagenHinderdael

Cocoon is a 3d printed decorative pendant celebrating craft and pushing the boundaries of new and sustainable technologies by transforming wood waste into an organic, technologically advanced light. A collaboration between designers HagenHinderdael and 3d printing specialists Forust, Cocoon celebrates an innovative way to create a more sustainable product. ### 4. Ihana Marset

This lighting system, created by Joanna Laajisto, consists of several opal blown glass diffusers that appear ductile and contrast with the firmness of the metal structure that determines its shape and fastens it to the ceiling. In an effort to offer ambient light for any classic or contemporary interior design project, this collection can be used to create light compositions. [www.marset.com](http://www.marset.com)

### 2. Cambria Astro

Created with hospitality settings in mind, the popular Cambria range welcomes a pendant to its offering. The Ultimate solution for modern, understated lighting schemes, fine details elevate it above other drum pendants thanks to a discreet metal ceiling rose, stylish braided fabric cable, and the lined polycotton fabric shade. ### 5. Torrey Cerno

The Torrey pendant delivers a high quality of light via an indirect source, emitting an even and diffuse light while not neglecting the need for a powerful delivered lumens package. The metal shades are sleek, robust and offered in various finishes. The round disc, which houses the LEDS and driver, is where Cerno inserts its signature solid hardwood available in walnut and oak. ### 3. StarDust Marc de Groot

StarDust, consists of dots and lines with different sizes and appearance. With quadrilaterals, pentagons and hexagons he managed to create a perfect spherical shape. StarDust spreads light like a stary sky projected on Earth and also refers to our galaxy where the position of the moon determines the tides of high and low tide. ### 6. Half and Half Roll & Hill

Half & Half launched in 2017 as the first collaboration between designer Jonah Takagi and Oslo-based designer Hallgeir Homstvedt. The play between the geometric shapes of the shade and ribbed glass was the starting point for this bold and iconic design, which has now been re-envisioned to include four new colours – green, blue, red and white. # Focal Point

## Private Residence

### Dongguang City, China

British Columbia based architect John Henshaw and his team frequently work in North America and China. Their impressive portfolio of projects demonstrates a transcendent aesthetic that blends eastern and western design harmoniously. Interior Designer Joy Chao of John Henshaw chose Cerno's large Calx pendant over the dining table and the Tersus Sconce for the theatre at this private residence.

Cerno's Director of Design Nick Sheridan studied architecture; as such all of his designs are rooted in his deep passion for purposeful modern design. The Calx pendant and Tersus sconce strike a balance between minimalism and functionality. The natural wood warms up this contemporary environment without diluting the sleek design. Powerful lighting statements can be made without showering a room in excess light; both these spaces use lighting strategically to tie in the room's design and set a relaxing and inviting mood.
