

### General Product information

This product is suitable for indoor dry locations only.

This product is to be installed to a standard 4" junction box with 3" round plaster ring or an octagon junction box.

### CAUTION - RISK OF FIRE

This product requires installation by a qualified electrician. Before installing be sure to read all instructions and **TURN POWER OFF TO THE JUNCTION BOX**

### Installing the Mounting Plate

- 1 Attach the mounting plate to the junction box using the supplied #8-32 screws. Orient and level the plate as shown in the figure.
- 2 Attach a suitable ground wire to the green screw in the mounting plate

### Attaching the Back

- 3 Connect the white fixture wire to the neutral power line with a wire nut.
- 4 Connect the black fixture wire to the hot power line with a wire nut.
- 5 Place all wires in the junction box.
- 6 Mount the back plate to the mounting plate using the supplied #8-32 screws.

## Attaching the Shade

- 7 Slide the shade onto the 4 posts protruding from the back plate until the back of the shade is flush with the wall.
- 8 Tighten all 4 screws on the mounting blocks inside the shade.

**Important Note!**

This fixture comes with a universal dimming driver that be controlled with a TRIAC, ELV, or 0-10V dimmer.

The purple and grey leads exiting from the LED driver are there to enable dimming of the fixture through the use of a compatible 0-10V dimmer. If the fixture is to be dimmed using a 0-10V dimmer, follow the wiring instructions provided with the dimmer.

If the fixture is NOT to be dimmed using a 0-10V dimmer, the tinned ends of these leads should be snipped off and the leads should be capped individually such that they remain isolated from one another.

The wiring diagram below only applies if the fixture is to be controlled by a 0-10V dimmer.
