# Cerno

---

July 8, 2019

Cerno introduces the Penna Collection, inspired by the use of materials – wood, leather and brass – and honoring their simplicity through precise detailing and execution. The resulting light fixture celebrates and confidently exposes the materials through clever design applications instead of the common need to hide fasteners and connections.

Penna is comprised of a single piece of walnut wood with brass hardware details and suspended by a leather strap, which creates a simple, yet highly stylish and contemporary fixture. The Penna Collection includes a pendant fixture and a wall sconce. The pendant is available in natural and dark stained walnut and 40- and 64-in. sizes.
