

The Big And The Bold

Valeo
Cerno

Designed by Cerno co-founder and designer Nick Sheridan, the Valeo oversized floor light fixture comes in at a staggering maximum height of 8ft. When reaching such a distance with a fixture, it is important that it feels visually efficient in its form but that it is still far from fragile, inviting people to linger underneath. The adjustability in the reach and height of the shade make it possible to custom fit the piece to its surroundings, which is an important characteristic for such a large piece.

Making use of solid wood and metal with a linen shade, the Valeo is dimmable and offers a light output of 800lms, light colour of 2700K, with 90+ CRI and uses 11W of power. Weighing 95lb, the fixture also includes a 72in clear silver cord with in-line foot switch, 24in from the base and uses a medium base E26 socket. cernogroup.com
