FEATURING 2,000 DECORATIVE LIGHTING SUPPLIERS WORLDWIDE

Outdoor

1. Acuo Cerno

On show: ICFF New York

The Acuo outdoor sconce is an existing design modified to withstand the elements. The materials have been meticulously designed to comply with UL's wet location requirements and the materials are exposed to the elements, they will continue to evolve. The goal was to design an outdoor line without compromising the clean modern lines that define Cerno's aesthetic.

4. Cyborg Martinelli Luce

On show: Euroluce Milan

The well-established Cyborg light designed by Karim Rashid has been reinvented as an outdoor light. Made from high-resistance, fiber-reinforced concrete with selected aggregates, the lamp body, with its three legs, and the internal positioning of the indirect LED, generates dramatic effects of light and shadow.

2. Facet Light-Point

On show: Euroluce Milan

Designed by Lars Vejen, the Facet wall lamp features a simple, functional and durable, yet classic design based on an asymmetric extruded aluminium profile with a square-shaped back. Two different angles are cut in to shape the profile so the dimmable LED spreads through the design. Light can be directed up or down as required.

5. Pencil Ai Lati

On show: Euroluce Milan

Pencil is a collection of rechargeable floor, wall and pendant lamps, with a step touch dimmer function. Made of anodised extruded aluminium, die-cast accessories, a polycarbonate diffuser and an LED light source, silicone seals ensure that the Pencil lamp has a high IP rating, making it ideal for outdoor use.

3. Synergy Pro Kooduu

On show: ICFF New York

Synergy Pro is a series of chargeable Bluetooth loudspeakers, which feature both warm LED lighting and an ingenious, multifunctional compartment. The Synergy Pro is produced in luxury materials with top grain leather handles and beautifully finished aluminum accessories, creating the perfect addition to any occasion.

6. Mask Faro Barcelona

On show: Euroluce Milan

Designed by Lúcid, Mask is a robust wall lamp that can be located near the sea as it is highly resistant to corrosion by salinity. It is made of injected aluminium, has an opal diffuser and has a 65 protection rating. It is a luminaire designed for areas with adverse environmental conditions as it has a high resistance against impact and corrosion.
