THE PRODUCT GUIDE

Project Profile:
CVLTVRA, Miami p64

Versatile, Modern Luminaires

Marbul's design emphasizes asymmetry and futuristic appeal. Capable of being specified as pendant, downlight or wall sconce, designers can also group the luminaire in a maximum of three spheres for a more architectural appearance. Rotate the fixture 360 degrees and tilt it to 45 degrees to suit a variety of applications. Marbul's rotation system conceals the fixture's screws from view, and its integrated LED gear keeps it looking elegant and light, giving the spheres a floating appearance.

Blown-Glass Chandelier

The Soffi Chandelier by Italian master glassmaker GamFratesi consists of two concentric rings of blown glass, each a different diameter. The chandelier's globes transition from matte white blown glass with a pearl finish near the fitting to transparent, faded milk white or smoke gray glass at the outer globe, creating evenly diffused light. The leather accent strap is available in camel or taupe with contrasting stitching raw-edge seams. Internal metal parts have a natural brass finish, and roses are white-painted steel with adjustable transparent cables. Available in three chandelier sizes and in single lamps, linear compositions with three globes, and bunch compositions with three or five globes.

Acoustic Pendant

The Birdcage Acoustic Pendant adds a decorative touch to open spaces while reducing ambient noise by up to 40 percent, per the maker. Created from a minimum of 65 percent recycled material, the pendant's form features segments made from 0.3-inch acoustic paneling. Available in more than a dozen colors, Birdcage also comes in a variety of sizes. Canopy sizes include small (19.5-inch diameter), medium (25-inch) and large (33-inch).

Outdoor LED Sconce Collection

Cerno's existing line of wall sconces can now withstand the elements. The materials and components of the Cerno Outdoor collection comply with and pass UL's wet location requirements. The line includes four outdoor sconce styles: Ansa (shown), Tersus, Calyx and Acuo. Each comes in available in a variety of shade finish choices, including marine-grade brushed stainless steel, antique bronze, and textured black, white or matte gray powder coat.
